Guidelines for invoices and order confirmations

Evatec uses a program that automatically processes your document (invoice or order confirmation). In order for your document to be read correctly, some points must be taken into account when displaying the document.

- Do not highlight or mark information with color
- List address not only in the logo but also separately as text
- Position numbers must be taken from our order
- A position must not be displayed across pages.
- For special lines there must always be a space before and after the line.
Ex.: drawing no. / index = 12051 / B

Thank you for your understanding
